Corsi di Formazione Professionale Continua per Giornalisti accreditati dal CNOG

The International Telematic University UNINETTUNO takes origin from NETTUNO - Network per l'Università Ovunque, model, active in Italy since 1992, and from the success of the European Project Med Net'U – Mediterranean Network of Universities.

UNINETTUNO Digital University is an international network where teachers and students coming from different places of the world produce, deliver and receive educational contents through television and the Internet. A technological network that is supported by a network of people, of minds capable of connecting and sharing their knowledge and who jointly created the International Telematic University UNINETTUNO and developed a virtual environment to spread knowledge globally.

On www.uninettunouniversity.net, students can attend the university with no more space and time limits. Anywhere in the world, you can choose whether to study in Italian, Arabic, English, French or Greek and earn a study title recognized in Italy, in Europe and in other countries of the world.

UNINETTUNO's psycho-pedagogic and didactic model is the outcome of the results of several international research projects, coordinated by Prof. Maria Amata Garito and by her research team. This model allowed to create, in the Internet, a didactic cyberspace in which the student is at the center of the learning path.

In the Didactic Cyberspace, it is possible to access the different learning environments, follow videlessons digitized by topics, linked in a multimedia, hypertextual and interactive way, to books, texts, selected bibliographies, webographies, exercises and virtual labs.

The Professors/tutors interact with the students through forums and interactive classrooms, also on Second Life and check their learning progress, interconnect minds and exchange knowledge at a global level.

On the satellite channel, uninettunouniversity.tv (SKY channel 812 and 701 of the Tivusat platform) and on the Web TV www.uninettuno.tv it is possible to follow the videlessons 24 hours a day.

UNINETTUNO's aspiration has always been to offer the young people across the world the tools to develop knowledge and competences. The students come from over **170 countries** across the world

In 2016, UNINETTUNO realized on the Internet, the **University for Refugees – Education without Boundaries** portal, allowing refugees to access for free the University from anywhere in the world, including the hosting centers of several countries. Providing this opportunity to migrants and refugees means giving them back their dignity and the courage to go ahead trusting humanity.

Thanks to its engagement in several international research projects, the International Telematic University UNINETTUNO is constantly evolving.

Many are the international awards and prizes proving the UNINETTUNO's excellence of at global level: it was recognized by **UNESCO** as one of the universities working and orienting its actions towards the achievement of the 17 "Sustainable Development Goals (SDG)" of the United Nations; it received a mention of honor at **2017 IELA** (International E-Learning Award - Academic Division) Prize at Columbia University and the US portal **E-Learning Inside**

included it among the 5 Top Stories for 2017, at global level, in the field of e-learning. Finally, on the 7th January 2019, the International Telematic University UNINETTUNO became a member of the **#JoinTogether network**, the only Italian university joining the Universities' global network supported by the UN and established to concretize the Sustainable Development Objectives (SDG16) of the 2030 UN Agenda, that are also connected to the democratization of the access to knowledge.

Education, Research and Innovation, Internationalization, Inclusion and Passion: these are the five principles that have always inspired all those who work to develop the model of the UNINETTUNO University; all together we realized a laboratory for cross-cultural and cross-linguistic cooperation that truly democratized the access to knowledge.

With UNINETTUNO, knowledge and culture move under open skies, without boundaries; new competences are created, new knowledge arises, and new values are shared.

EDUCATIONAL OFFER

32 Degree Courses provided by **5 Faculties** whose aim is to develop skills linked to technological innovations and to the demands of the new labor markets.

ECONOMICS AND LAW FACULTY

Three-year Degrees

Economics and Business Management:

1. Economics and Corporate Governance
2. Culture, Tourism, Territory and Corporate Value
3. Business Management
4. Financial Management
5. Business management
(with the Berlin School of Business & Innovation)
6. Digital Economy and Law

Second-Cycle Degrees

Business Management and Digital Technologies

1. Business management and digital technologies
2. Green economy e sustainable management
3. Digital marketing for business
4. Digital Law and Economics

ENGINEERING FACULTY

Three-year Degrees

Management Engineering

1. Economics path
2. Production path
3. Digital management of building processes

Computer Engineering

1. Processing Systems and Networks
2. Intelligent Systems
3. Information and communication technologies engineering
(with Helwan University)

Second-Cycle Degrees

Management Engineering

1. Management of Industrial Processes
2. Energy Systems
3. Industry 4.0

Computer Engineering

1. Big Data
2. Programming and security

Civil Engineering

1. Architecture and engineering for sustainability, the environment and infrastructure
2. Structures and Infrastructures

PSYCHOLOGY FACULTY

Three-year Degrees

Psycho-pedagogic Disciplines

Second-Cycle Degrees

Cognitive Processes and Technologies

1. Cyberpsychology
2. Neurosciences
3. Clinical Psychology of Childhood and Adolescence

COMMUNICATION SCIENCES FACULTY

Three-year Degrees

Communication Sciences

1. Public Institutions and Digital Media
2. Digital Corporate Communication

CULTURAL HERITAGE FACULTY

Three-year Degrees

Second-Cycle Degrees

Conservation and Valorization of Cultural Heritage

1. Operator and expert in cultural heritages and digital memory
2. Operator and expert in cultural heritages and landscapes: languages and codes for mediation

Cultural Heritages in the Digital Era

1. Archaeological and museum heritages in the digital humanities
2. Archival and textual heritages in the digital humanities

MASTER - MBA - DBA

MASTER

- Circular Economics 4.0: Energy, Technology and Environment
- Energy Management
- Business Law for the Fashion System
- Finance and Investments
- Management and Conservation of Cultural Heritage in the Digital Age
- Health Management
- Impact of traumatic and/or stressing experiences: prevention and intervention strategies
- Strategies and Techniques of Project Management
- Manager for socio-labour inclusion
- Cultural Heritage and Enogastronomy
- Strategic Marketing
- The Big Data for Civil Engineering and Architecture B.I.M. MASTER & Professional training course
- International Tourism, Hospitality and Event Management
- Public Health
- Logistics
- Engineering Management
- Degree in Workplace Safety Law
- European Union Studies: Cultures and History, Policies and Global Perspectives
- Journalism and Cross-media Communication
- Psychological Sciences
- Sustainable Architecture and Design

MBA

- Global MBA - "Blended edition"
- Global MBA - Master of Business Administration
- Maritime and Shipping Management
- Accounting and Finance

DBA

- Doctorate in Business Administration - "Blended edition"

DOCTORAL STUDIES

1. Law and Economics of Digital Society
2. Technological Innovation Engineerin
3. "Defense Against Natural Risks and Ecological Transition of Built Environment"
4. Mind and Technologies in the Digital Society
